Professional Profile

Product Designer with 5+ years of experience designing SaaS platforms and data-heavy monitoring systems. Specialised in simplifying complex workflows through system thinking, intuitive data visualisation, and scalable design patterns. Experienced in end-to-end product design from research and problem definition to high-fidelity solutions shipped with engineering teams.

Experience

Fujitsu (Lollypop design studios) | Senior Product designer | 2023 - Present

- Design solutions for **enterprise network management environments handling high-volume monitoring and alarm events** across telecom infrastructure
- Lead UX design efforts for **Virtuora enterprise SaaS applications**, improving usability across complex operational and monitoring workflows
- Identify UX challenges across multiple products and translate technical and business requirements into intuitive user experiences
- Conduct workflow analysis and gather user feedback to uncover usability gaps and guide product design decisions
- Collaborate closely with product managers, engineers, researchers, and designers to define problems, explore solutions, and deliver production-ready designs using Figma and FigJam
- Contributed to refining the **global Virtuora design system**, improving consistency and scalability across enterprise interfaces
- Manage design responsibilities across **multiple products and parallel initiatives**, balancing priorities while maintaining delivery timelines
- Partner with engineering teams during implementation to validate shipped experiences and ensure alignment between design intent and the final product

BYJU'S | Product designer | 2022 - 2023

- Collaborated with designers and engineers to **redesign the Aakash learning application**, improving the experience for students attending live courses
 - Worked closely with product managers and UI teams to iterate on learning workflows and continuously improve usability across the platform
 - Contributed to the conceptual design of **BYJU'S English Learning Application (ELA)**, enhancing live class interactions in collaboration with Oxford University
 - Participated in design reviews and cross-team discussions to refine features and align product decisions with learning goals
-

Achievements

- Design Evangelism | Helped elevate the role of UX within the team by consistently delivering high-impact design work and collaborating closely with product and engineering stakeholders, contributing to the adoption of UX as a core part of the product development process.
-

Skills

- Product design | Product Design, Interaction Design, Information Architecture, UX Strategy
 - Research & Discovery | User Interviews, Usability Testing, Workflow Analysis
 - Systems & Data | Enterprise UX, Data Visualisation, Monitoring Dashboards, Complex Workflows
 - Tools | Figma, FigJam, Figma make, Balsamiq, Adobe Creative Suite, Jira
-

Education

Bachelor of Engg – Aeronautical | DSCE, Bangalore
